

Enterprise Server Installation

The Enterprise version is installed locally on your own server, maintaining the software data on your own property. Requires on-site IT staff.

Hardware Requirements

- 1 GB RAM
- Raid 5 or backup hardware

Software Requirements

- MS-Windows XP Pro or Windows Server 2003
- MS-SQL Server
- IIS
- Internet Explorer 7.0 or above

Web-based Hosted Solution

Most of our clients opt for the hosted solution, which provides them secure access to their application hosted on our secure Grace Software, Inc. servers.

Hardware Requirements

- Pentium IV
- 1 GB RAM

Internet Speed & Connectivity.

Easy InnKeeping ASP requires a reliable, high-speed internet connection (Cable, DSL or T-1)
Minimum 1.5 MB download

Software Requirements

Windows XP, Windows 2000, Windows VISTA

Recommended browser: Internet Explorer 7.0 or above.
